## Education

<b>Cactus Education</b>	Prishtine
Web and App Developer	2023/2025
Relevant Coursework: Systems Programming, Data Structures and Algorithms, OOP, Machine Learning, Trigonometry, Penetration Testing, UI/UX.	
<b>Lutfi Musiqi High School</b>	Vushtrri
IT Technician	2020/2023
I was the schools IT for 2 years, I have configured Servers, PCs, Printers and Networking devices. I held meetings, presented complex websites that I made to the board.	
<b>Universum College</b>	Lipjan
BA of Computer Science	2025/2026
I've deepened my studies here and advanced my skills in Deep Learning, Machine Learning, Systems Security, Mathematics, Research Methods, where I also have built a Chatbot that implements NLP, and performed penetration tests.	

## Technical Skills & Projects

**Programming:** Java, Python, SQL, JavaScript, PostgreSQL, MSSQL, Swift, Kotlin.  
**Frameworks:** Spring Boot, VueJS, Bootstrap, Flask, StreamLit.  
**Design:** Figma  
**Networking:** Active Directory, System Automation, CCNA, CPT, Penetration Testing, CEH, Offense Security, Systems Security, Linux, Kali Linux, MacOS.  
**Soft Skills:** Communication, Problem-Solving, Customer Service/User Focus, Organization & Time Management, Team Work, Attention to Detail, Leadership, Critical Thinking.  
**Languages:** English, Serbian, Russian, Albanian.

### **Fullstack final project**

Created a fullstack web application about Bus Arrival Info using spring boot and JWT auth, implemented RBAC for not allowing users to view and have admin privileges, used postgresql for the database. Implemented the front using Vue 3.

### **Penetration Test final project**

Exploited a system using Kali Linux and managed to get root privileges, implemented 12 exploits and tweaks on 12 different ports and services, recommended solutions and fixes for those services/ports and possible future threats.

### **UniBot**

I have built this chatbot using PyTorch, NLP, Python and Flask. This is an integrated AI Chatbot that people can integrate onto their own websites and modify its content. It is very delicate and requires a lot of knowledge for others to implement. I have developed my skills in python, deep learning, and critical thinking while creating this project.

## Experience

<b>Everywhereestrema</b>	USA
<b>Business Intelligence Scout/Technical Research Assistant</b>	Mar 2024-May 2024
Conducted independent scouting and lead generation for laundromats, garages, storage facilities across 6 U.S states to identify high-potential acquisition targets.	
Researched company websites for <b>UI/UX flaws, design issues, SEO weaknesses</b> and outdated content, delivering written reports with improvement recommendations.	
Analyzed commercial websites to assess professional presentation, security concerns.	
Delivered clean, structured PDF reports used by the CEO to make real-world buying decisions.	
Worked fully remote, showcasing initiative, web analysis skills, and strong written communication in English.	
<b>Anova Research Team</b>	Prishtine
<b>Market Research Agent</b>	Feb 2023 - Jun 2023
Conducted market research interviews via telephone, gathering and recording data accurately. Analyzed information and contributed to data collection efforts for various projects.	
<b>WKS</b>	Vushtrri
<b>Market Research Agent</b>	Feb 2022 - Jun 2022
Reinforce transferable skills like active listening, data entry, and adherence to protocols.	
Developed strong interpersonal and communication skills. Maintained professional communication with diverse respondents.	

## Certifications

<b>IT Essentials</b>	Cisco
Gained foundational, hands-on competency in computer hardware, software, operating systems, and basic networking, ensuring robust IT infrastructure support.	
<b>Python Programming</b>	Bit Academy
Acquired practical skills in Python for application development, data manipulation, and scripting, covering core programming concepts.	
<b>Security Operations Fundamentals</b>	Palo Alto Networks
Insight into SOC workflows, the incident response lifecycle, log analysis, and fundamental threat investigation techniques.	
<b>CyberSecurity Fundamentals</b>	Palo Alto Networks
Core understanding of threats, vulnerabilities, Zero Trust, and risk management frameworks enabling a holistic approach to protecting hybrid IT environments.	

<b>Cloud Security Fundamentals</b>	Palo Alto Networks
Knowledge of securing public cloud (IaaS/PaaS/SaaS) deployments, CASB, understanding the shared responsibility model, and cloud-native security tools.	
<b>Network Security Fundamentals</b>	Palo Alto Networks
Competence in firewall operations, network segmentation, VPNs, and implementing perimeter security controls.	
<b>Social Media Management</b>	Growzillas Academy
Developed expertise in digital marketing strategies, content creation, and audience engagement specific to social media platforms.	
<b>Web Development</b>	PBC Academy
Gained proficiency in fundamental web technologies (HTML, CSS, JavaScript, PHP, MySQL) and modern frameworks for building responsive and interactive web applications.	
<b>Web Development</b>	Universum College
Enhanced practical skills in web development principles and techniques through hands-on training and project participation.	
<b>Introduction to CyberSecurity</b>	Cisco
Certified in core cybersecurity principles, data confidentiality, and threat actor behaviors, establishing a strong foundation in protecting data and critical infrastructure.	
<b>Soft Skills</b>	Bit Academy
Developed essential interpersonal and professional skills, including communication, Teamwork, Leadership, Critical Thinking, Problem-Solving, and Adaptability.
